Vanguard Integrity Professionals proudly launches a New Cybersecurity Website

*Authentication, Administration, Audit & Compliance - the framework of Vanguard's
Cybersecurity portfolio.*

LAS VEGAS – August 01, 2016 – Vanguard Integrity Professionals, Inc. is pleased to announce the launch and immediate availability our new www.go2vanguard.com website.

The primary objective with the website is to provide visitors with a simple method to learn and stay updated about Vanguard Integrity Professionals and our rich offering of cybersecurity solutions. The website is interactive and automatically adjusts to the viewing device. It also provides better access to the solutions we offer and the collateral our experts have developed related to those solutions.

The site includes extensive product and detailed solution information to help customers understand Vanguard's complete range of cybersecurity solutions. Data Sheets, Solutions Briefs and Corporate Overviews work together to provide a comprehensive overview of Vanguard's capabilities across a wide range of industry verticals, including the "nation's critical infrastructure" Vanguard so proudly protects.

The website highlights the foundation of the Vanguard Cybersecurity framework based on **Vanguard Administration** a powerful cybersecurity solution that automates processes, offers powerful reporting with real-time management and provides control over policy administration; saving time, resources and money.

To meet today's need for comprehensive **Enterprise Authentication**, Vanguard delivers the most robust, scalable, modular authentication solution enabling enterprises to control and secure access to the entire IT infrastructure. Vanguard simplifies enterprise authentication and access control.

When Compliance is critical Vanguard can help with **Vanguard Audit & Compliance**, an extensive audit and compliance solution, enabling configuration, adjustment and continuous monitor using the latest standards and data security policies to determine, isolate and ensure standards compliance.

Created with the user experience firmly in mind, the website was designed using the latest web-development technology so it is compatible with the latest browsers and mobile devices.

Additionally, customers and prospects will find fresh, new content, providing a much richer online experience with easy navigation and the ability to share with others, while assisting in the selection of powerful solutions designed for large enterprise cybersecurity. Prospects and customers can also stay up-to-date and informed with the latest on Vanguard and our industry leading cybersecurity education and training programs.

“Vanguard is dedicated to continual improvement of our products and solutions and rapid innovation in cybersecurity. Our primary goal with the new website is to reflect the impact and value of our cybersecurity solutions especially when risk to critical systems is so great around the globe,” said Brian Caskey, chief marketing officer at Vanguard. “We are excited to launch the new site and we hope that our customers and prospects will enjoy the new, innovative Vanguard experience.”

Key Takeaways
