Vanguard Integrity Professionals Announce Enhanced Multi-factor Authentication Solution

The most cost effective way to secure corporate enterprise access…

LAS VEGAS – January 17, 2017 – Vanguard Integrity Professionals is pleased to announce the immediate availability of its enhanced Multifactor Authentication solution across its enterprise-wide cybersecurity software suite.   Vanguard Multi-factor Authentication is a scalable, modular integrated authentication solution that enables enterprises to control and secure access to the entire IT infrastructure. Vanguard simplifies enterprise authentication supporting a multitude of advanced multifactor authentication capabilities depending on your enterprise requirements. Vanguard's enhanced authentication capabilities include Token, Tokenless, PIV Card and an industry leading range of standards based token support making Vanguards Multifactor Authentication solution one of the most robust in the industry.

"Vanguard is dedicated to continual improvement of our products and solutions especially when the risk to critical data and systems is so great for our customers around the globe," said Brian Caskey, chief marketing officer at Vanguard. "We continue to enhance and improve our already powerful support for an already high-performance solution. Vanguard's multi-factor authentication solution allows users to authenticate through common token technologies including but not limited to DUO, RSA SecurID®, YUBiKEY, OATH tokens, SafeSign, ActivID® tokens and many other standards based tokens.

Key Takeaways

• Vanguard simplifies enterprise authentication supporting several multifactor authentication solutions including Token, Tokenless and PIV Card.

• Vanguard's multi-factor authentication solution allows users to authenticate through common token technologies including but not limited to DUO, RSA SecurID®, YUBiKEY, OATH, SafeSign, ActivID® and many other standards based tokens.

• Integrates with Vanguards Cybersecurity Solutions Securing Any Enterprise.
