Vanguard Integrity Professionals Announce Vanguard Analyzer™ Provides Expert-Level Vulnerability Assessments

System Auditors Can Review Analyzer Findings in order of Priority and Mitigate Risk

LAS VEGAS – April 18, 2017 – Vanguard Integrity Professionals is pleased to announce the immediate availability of its Vanguard Analyzer™ solution available across its enterprise-wide cybersecurity software suite. Vanguard Analyzer™ delivers expert-level vulnerability assessments of z/OS™ Security Server configuration controls and security settings with the ability to produce audit results in minutes.

- Vanguard Analyzer is your security team's toolkit to check system integrity and audit assessment.
- Do you have access to expert-level assessment based on severity and vulnerabilities?
- Are your security analysts armed with invaluable interpretation of assessment findings?
- Can you provide your company with a detailed explanation, easy to understand risk statements and corrective actions that need to be followed step-by-step?
- Simplify and expedite your security analysis when there are not enough hours in the day, people on your staff and finances in the budget.
- Help your security staff verify system integrity and validate security assessments.
- Get detailed reports for your security team and company with each risk ranked by severity.
- Provide your company with an in-depth overview of the current system status, exposures and priorities requiring immediate action.
- Reduce literally days of work for your security team in literally minutes, saving time, money and potential security breach.
- Implement "best practices" auditing across your enterprise with detailed audit procedures to implement.

"Vanguard is committed to the advanced development and delivery of best in class cybersecurity products and solutions especially when the risk to critical customer data is so high," said Brian Caskey, chief marketing officer at Vanguard. "We continue to enhance, upgrade and improve our already high-performance security solutions. Vanguard's robust Analyzer™ solution runs thousands of integrity checks to ensure system and enterprise integrity.

Key Takeaways

- Provides risk analysis and mitigation requirements in an easy to read solution.
- System auditors can review Analyzer findings in order of priority and mitigate accordingly.
- Alerts written in simple business language, reducing the knowledge levels required.
- Risk assessments are ranked by severity, ranging from informational to an actual security or integrity breach requiring immediate action.
