VANGUARD INTEGRITY PROFESSIONALS ANNOUNCES THE LAUNCH OF VERSION 2.3 SECURITY AND COMPLIANCE SOFTWARE FOR IBM z/OS® SECURITY SERVER

***Increased Security for the Enterprise and Digital Transformation with over 100 new features
and enhancements, significantly increasing performance.***

LAS VEGAS, NEVADA – September 29, 2017 – [Vanguard Integrity Professionals, Inc.](#) cybersecurity experts with cybersecurity solutions securing any enterprise, is pleased to announce the launch and immediate availability of Version 2.3 Security and Compliance software for the IBM z/OS Security Server. This version of Vanguard software improves on nearly every aspect of its predecessor offering a vast array of new features and functionality along with significant performance enhancements at a time when data security is crucial.

“Vanguard is dedicated to continual improvement of our products and solutions especially when the risk to critical systems is so great for our customers around the globe,” said Brian Caskey, Chief Marketing Officer at Vanguard. “We have added many new advanced security and compliance features to an already high-performance software suite. With the launch of Version 2.3, we continue to prove our commitment to our customers and the security of their enterprises.”

Vanguard’s latest Version 2.3 software includes more than 100 new features and enhancements enabling our customers to achieve a higher level of security, a deeper level of control and the ability to respond more rapidly than in the past to any cybersecurity challenge. Some of the top enhancements in Version 2.3 include:

- Vanguard Enforcer: Includes a new accessor environment element (ACEE) Sensor that will detect and report upon the Elevated Authorities contained in the ACEEs that are different to their definition in the Security Server.
- Multifactor Authentication now supports Session Management and Enterprise Authentication
- Vanguard Policy Manager – includes a new Command Policy that prevents changes to users or users connected to a group.
- Policy Manager – Delivers new functionality that reports on changes to specific profiles or all profiles in the RACF database.
- Vanguard ez/Token for RSA SecurID now supports the use of a RACF Password, RSA PIN and Token for Multifactor Authentication.
- SIEM Integration with all of Vanguard’s Active Alerts.
- Vanguard ez/Token now supports PING, DUO, LinOTP and other backend authentication servers
- The ability to Synchronize Passwords across Supported Platforms.

VANGUARD
