

VANGUARD ETF/R - FIRECALL

Extended RACF Privilege Access for
Emergency Situations

PRODUCT DESCRIPTION

Vanguard Firecall for RACF (ETF/R) provides the ability to extend normal access in an emergency situation by granting a USERID special access privileges. With ETF/R, security administrators can pre-define who gets emergency access privileges. Users may have limited or unrestricted emergency access according to their need at the time and the limits set by the security administrator. All emergency access is journaled and reported.

BUSINESS CHALLENGE

Organizations have become increasingly aware of the value of their critical data. While outages of physical equipment may pose a temporary inconvenience, outages of critical information have been demonstrated to be devastating to companies. Loss of critical data has been measured in millions of dollars and has even been known to lead to the ultimate demise of a business.

VANGUARD SOLUTION

ETF/R effectively mitigates the risk of sensitive information exposure or damage, while also granting on-demand access to support personnel to swiftly minimize the impact of any potential outages. With ETF/R, support personnel no longer require full-time access to sensitive resources. Access is obtained on demand through the activation of one or more firecall privileges.

KEY FEATURES

- Simplifies the administration, and increases the quality and effectiveness of RACF security implementation
- Quickly restores RACF profiles
- Integrates with other Vanguard RACF security solutions
- SURROGAT Class Analysis Reporting options

KEY BENEFITS

- Improves operational efficiency
- Reduces risk and exposure
- Minimize disruption
- Help with administrative effort
- Streamline & clean up the RACF databases
- Help meet audit requirements for Emergency Access
- Identify potential exposures
- Report on user access and usage
- Assists in implementing a Zero Trust environment
