

## GOVERNMENT (ANALYZER)

Vanguard Analyzer is security software for expert level, vulnerability assessments of security controls and settings with the ability to produce fast system snapshots and audit results in literally minutes. Vanguard is the choice of government agencies globally in eliminating vulnerabilities in large enterprise implementations to help assure Regulatory Compliance.

### GOVERNMENT AGENCIES

Contrary to popular opinion that the mainframe is dead, the mainframe is still the choice of over 225 state and local governments worldwide due to its scalability, reliability and performance. It is in use at various government sites including the Office of the President, the US Senate, the Federal Reserve System, CIA, NSA, much of the Department of Defense (DoD), and many more outside of the U.S. including MI-5 and the entire Australian Government. Without mainframes, many governments could not operate their departments of health and human services, tax departments or departments of motor vehicles, or run the numerous other baseline governance activities on which taxpayers depend.

**ACCORDINGLY, GOVERNMENT SYSTEMS ARE BEING TARGETED BY STATE SPONSORED GROUPS AND SENSITIVE INFORMATION STOLEN**

Six recent hacks targeted the US Office of Personnel Management (OPM) and its contractors alone, resulting in the theft of 21.5 million sensitive records. Those records included background check data, addresses, employment history, financial and mental health information, usernames and passwords for government systems, as well as 1.1 million biometric profiles of government employees and contractors. The breaches are believed to be the work of state sponsored actors.

In the last couple years as well, the US Department of State, the US Postal Service, the National Weather Service, and the White House have all suffered intrusions.

**WHAT SHOULD GOVERNMENT AGENCIES DO TO PREVENT HARMFUL AND EXPENSIVE BREACHES?**

Simply put, government agencies should place the same degree of emphasis on their mainframe security controls as they do on the mission critical applications and business processes that run on them. With this in mind, VANGUARD ANALYZER is the choice of the world's largest banks, insurers, branches of government, and retailers for this purpose.

**VANGUARD ANALYZER SOFTWARE**

*Ensuring your mission critical systems, applications and business processes are secure*

VANGUARD ANALYZER delivers expert level vulnerability assessments and audit results in minutes, leveraging Vanguard's extensive knowledge of security best practices.

If there are security issues where you are at risk, findings are ranked and presented in order of importance so they may be expeditiously addressed.

The corrective actions security personnel need to take to rectify identified vulnerabilities are also plainly laid out in simple language thanks to Vanguard's proprietary Smart Assist® technology, simplifying and streamlining the corrective action process.

*Comprehensive system auditing made easy with VANGUARD ANALYZER*

Vanguard Analyzer runs thousands of integrity checks automatically, eliminating the multitudinous manual tasks associated with the audit process. Specific tests can be run individually, or a system overview report can be selected. VANGUARD ANALYZER cuts so much time out of these processes that checks and assessments can be conducted much more frequently. The obvious benefit being that you're constantly current on exactly where you stand and ready for external auditors.

### **WHY VANGUARD?**

Vanguard offers the most advanced and integrated portfolio of enterprise security products and services in the world. The portfolio was the first to offer a fully automated baseline configuration scanner for mainframe DISA STIGs – the Gold Standard for Security.
