

VANGUARD Security Manager™

VANGUARD
INTEGRITY PROFESSIONALS
CYBERSECURITY EXPERTS

Analyze

Provides real-time administration for z/OS Security Server and DB2 on Windows desktops and mobile devices

Productivity

Enables automated recurring, time-consuming task-oriented administration

Reporting

Allows comparing profiles on the same or different database

Automates

Automatically generates the correct command to accompany each action

Vanguard Security Manager is an easy-to-use solution for non-technical personnel to administer and report on all z/OS Security Server and z/VM systems across the enterprise with a simple to use web-based interface.

Security Manager includes comprehensive access analytics and flexible reporting capabilities to help security teams rapidly identify problems and allow auditors to quickly view system changes and report findings.

An easy-to-use web-based interface that enables inexperienced security administrators to perform operations such as defining and granting access to users and groups, resetting passwords and scheduling reports without knowing RACF commands.

Key Features:

- Provides real-time administration for z/OS Security Server and DB2 with point-and-click, across windows compatible desktop and mobile devices.
- Enables automated recurring, time-consuming “tasks-oriented” administration.
- Allows comparing profiles on the same or different databases.
- Automatically generates the correct commands to accompany each action.

The Analytics and Reporting Capabilities in Vanguard Security Manager Include:

More than 100 pre-built Vanguard Best Practice reports that analyze RACF database for potential security threats can be run on an ad-hoc or ongoing basis. Reports can be generated about Connects, Data Sets, General Resources, Groups, Users, and Global Table Display Values. Security administrators can use these reports to analyze the RACF database for potential security threats to enterprise data.

The report generator is used for creating customized, complex security reports with an easy-to-use, point-and-click, SQL-based report editor. Criteria can be added to prebuilt reports to create a custom report. Security administrators can generate complex security reports on an ad-hoc or ongoing basis.

Vanguard Security Manager provides automated audit reporting to ease auditing tasks by making it easy for auditors to view changes made to the security system in support of production needs. Security administrators can report findings to auditors using Vanguard Best Practices or customized reports.

Vanguard Security Manager provides support for reporting on multiple RACF databases with automatic scheduling of reports to run daily, weekly, monthly or annually and can be emailed to appropriate individuals in Excel®, comma delimited or PDF formats.

Key Differentiators

- Easy-to-use web-enabled Security Administration and reporting for z/OS Security Server and z/VM
- Allows complete enterprise-wide reporting, individuals can report against one, more or all entities and can schedule reports to run on a continuous basis.
- Combines automated security administration, analytics and reporting in one complete package.
- Reports are created using industry standards based on SQL.
- Provides cross-system support for user access and authority.
- An easy-to-use, web-based interface enables inexperienced security administrators to perform operations such as defining and granting access to users and groups, resetting passwords, and scheduling reports without knowing security commands.
- More than 100 pre-built Vanguard Best Practice reports that analyze RACF databases for potential security threats that can be run on an ad-hoc or ongoing basis.
- Support for reporting on multiple security databases—Automatic scheduling of reports to run daily, weekly, monthly, or annually, and emailed to appropriate individuals in Excel, comma delimited or PDF format.

VANGUARD Security Manager™

Why Vanguard to Secure Your Enterprise?

Almost half of the Fortune 1000 companies in the world spanning banking, retail, insurance, as well as numerous government agencies trust Vanguard with their enterprise security.

About Vanguard Security Solutions

Vanguard offers the most advanced and integrated portfolio of enterprise security products and services in the world. The portfolio was the first to offer fully automated baseline configuration scanner for Mainframe DISA STIGs— the Gold Standard for Security.
